METAL FINISHING MODEL SHOP PROGRAM

Thank you for expressing an interest in participating in the Metal Finishing Model Shop (MFMS) Program. The MFMS Program is a pollution prevention partnership project sponsored by the Department of Toxic Substances Control, the City of Los Angeles City, Bureau of Sanitation, the Sanitation Districts of Los Angeles County, the City of Burbank Public Works, the Orange County Sanitation District and the Metal Finishing Association of Southern California. As a result of recent statutory changes, the MFMS program will be expanding throughout California. This program has been developed to assist metal finishing businesses in identifying sources of pollution within their business and ways to improve upon existing pollution prevention efforts. In addition, the program includes a unique opportunity to obtain compliance assistance in pretreatment discharge requirements and in understanding hazardous waste generator requirements specific to your business. Each business which successfully completes this program will be formally recognized for their pollution prevention efforts achieved through the MFMS Program.

Enclosed please find the Application Package for the MFMS Program. The Application Package consists of two forms, a General Business Information Form and a Pollution Prevention Pledge. Please complete both of these forms and submit them back to me at the address listed above, to begin the process.

If you should have any questions regarding the MFMS Program, please do not hesitate to contact me at (818)551-2936 or erayas@dtsc.ca.gov.

Sincerely,

Evelina Rayas
